

Your Self hosted

AI Software Development Agent

Google for Startups

SBER 500

Equipped with Responsible AI Safeguards

Built by a team that understands *Enterprise*

Ayush Singhal
Founder & CEO

Ex-Twitter,
Rephrase AI(acq. By Adobe)

Kshitij Tyagi
Co Founder & CTO

Ex Googler- Google Search
Team (NY, US)

Shama Ahlawat
Chief of Staff

Ex-IG group, Mckinsey

Naveen Gupta
Chief Financial Advisor

CFO @LambdaTest| Prev. CFO
@Innovacer, Thomson Reuters

The Real Bottleneck in SDLC*? *Fragmented Knowledge.*

66%

of developers cite "almost correct" suggestions as their biggest time sink.

72%

take 1-2 months to submit meaningful PRs in an existing large codebase.

CodeMate's *Solution.*

AI agent that Learns the way you build technology. Until coding feels like thinking.

Preferences

Unique *Value Proposition*

Deep Context Awareness
of Organisation
Knowledge Base with self
learning capabilities

Local First Approach
(runs entirely on
developer's
environment)

End to end SDLC with
Built in Responsible
AI Safeguards and
security guardrails

CodeMate *Suite of Products*

Integrated with industry leading developer environment

C0

Deep codebase intelligence for reviews, debugging and generate test cases.

CHAT

Context-aware AI integrated with Jira & KBs.

BUILD

From Figma, Prompts and BRD files to working MVPs.

CORA

Autonomous coding agent with real developer capabilities & governance guardrails.

PR REVIEW AGENT

Automated PR checks and code reviews before production.

AI-Powered Software Development

Building and modernizing logistics software, faster.

Logistics Software We Build & Modernize

One Unified Platform. Smarter Operations. Better Decisions. Greater Impact.

Insights

Case Study: Maruti Suzuki

Accelerating Enterprise Software Development with AI

THE CHALLENGE

Business teams needed internal applications faster.

Supply chain processes required better coordination.

Manual software development slowed innovation.

Long delivery cycles delayed business initiatives.

THE SOLUTION

Enabled **AI-powered** enterprise software development

Internal Tool Development

Custom tools built for internal teams

Supply Chain Optimization

Connected systems for better coordination

Invoice Workflow Automation

Automated invoice tracking and approvals

AI-Assisted SDLC

AI-powered development, testing, review & continuous improvement

BUSINESS IMPACT

Faster software delivery

Improved supply chain collaboration

Accelerated invoice processing

Reduced manual engineering effort

Faster business innovation

From months of development to **rapid enterprise application delivery.**

Manufacturing Use Cases

Smart Solutions. Efficient Operations. Measurable Impact.

Fleet Management System

Real-time Tracking

Route Optimization

Fuel & Maintenance Insights

Logistics Issues Resolved

Employee Management System (HRMS)

Employee Records

Shift & Attendance Management

Leave & Payroll Management

Performance & Compliance

Floor Management System

Real-time Floor Monitoring

Machine Utilization Tracking

Operator Performance

Higher Productivity

Industry Trained AI Model

Fine-tuned with real-world enterprise data across multiple industries.

Manufacturing

Smart operations
and production
excellence

BFSI

Secure, compliant
and intelligent
financial solutions

Automotive

Intelligent mobility
and connected
ecosystems

Healthcare

Better care through
intelligent
systems

IT & ITES

Accelerating digital
transformation
with automation

Retail & Logistics

Smarter supply chains
and customer
experiences

Domain-Aware

Understands industry
workflows and context.

Higher Accuracy

Context-rich insights
with better precision.

Faster Adoption

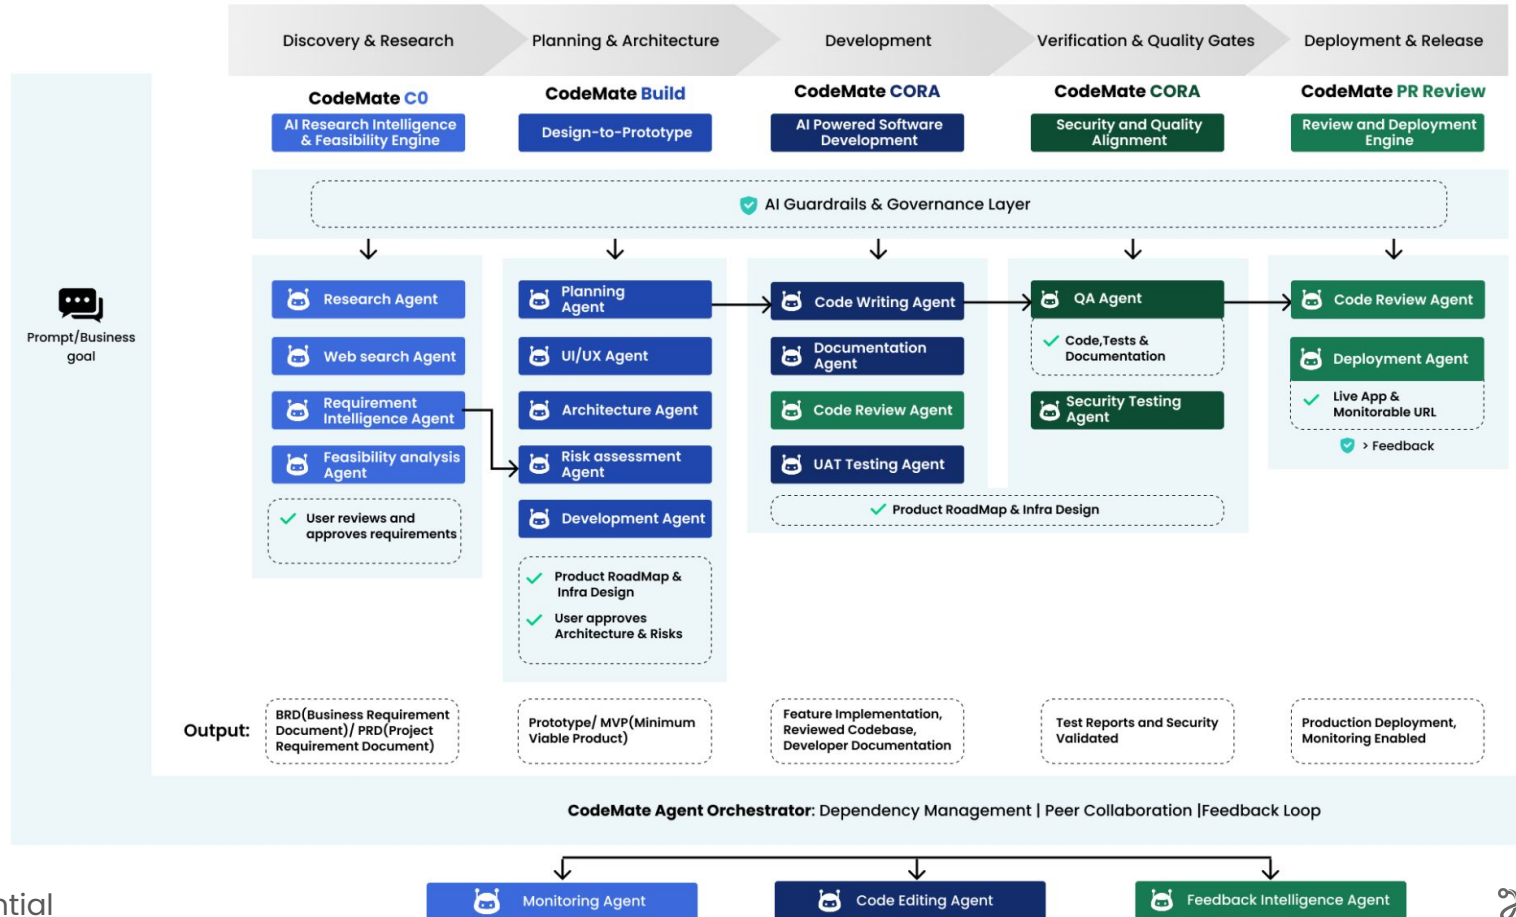

Pre-trained expertise
reduces onboarding time.

Enterprise Ready

Private, secure and
compliant deployments.

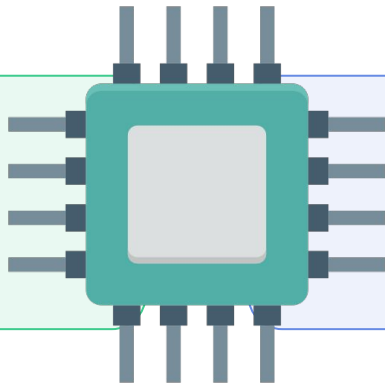

Assistive & *Autonomous Responsible AI Agent* Automating end-to-end SDLC

On-Device AI Execution Capabilities

Hardware-Optimized Inference

ONNX Runtime Execution Graph

Memory Resident Models
Prefix Caching with KV Cache
Dynamic NPU/GPU Routing

<100ms Tokens latency

Runs Offline

NPU-Efficient Inference

On-Device Privacy

Ecosystem
Partners

Qualcomm

intel.

Key Performance Indicators **Achieved**

Velocity

50-60%

End-to-End Cycle Time Reduction
(Idea -> Production)

Efficiency

30-40%

Cost per Feature Reduction
(Dev + QA + Ops)

Human Capital

40-60%

Human Effort Avoided
(Manual task reduction)

AI Capability

>= 70%

AI Agent Autonomy
(Tasks completed without
human intervention)

Quality

High

Growing Knowledge Reuse Index
(Artefacts reused by AI)

Experience

>= 4.5 / 5

Developer Satisfaction
(DX score)

CodeMate's *Global Presence & Partnerships*

1M+

Users onboarded since launch and growing

52+

Countries across 6 continents

Our Strategic Partners

HPE

intel

neysa

Qualcomm

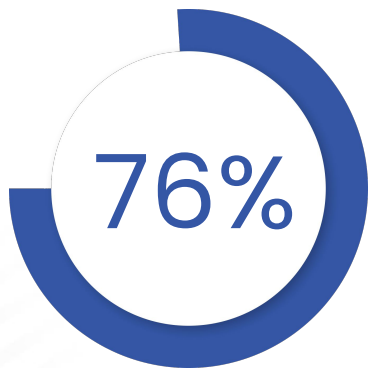

SAMSUNG

TVSCREDIT

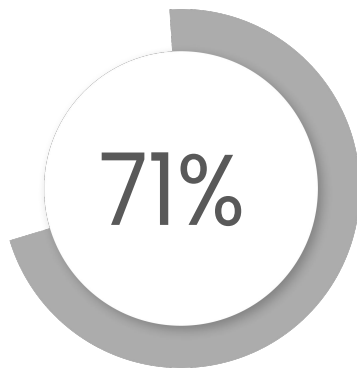

MARUTI SUZUKI

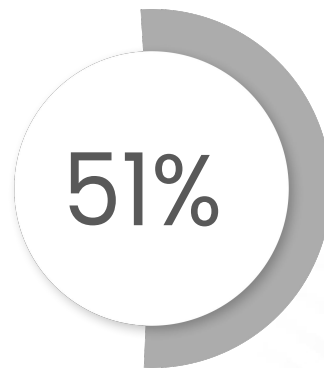

Achieving **SOTA** on **Global SWE Benchmarkings** (SWE-bench verified dataset)
